Torvi Onega

Warm, lightweight winter EVA boots

- Trendy
- Lightweight
- Waterproof
- Comfortable
- Made of hypoallergenic EVA material
- Removable liner
- Anti-slip outsole

Modern, comfortable, multifunctional EVA boots Torvi Onega are designed for people leading an active lifestyle. With the latest technology and modern materials, Torvi Onega retains more heat than ordinary boots, while protecting feet from getting wet. This footwear is ideal for any pastime, at the same time it will be pertinent both in the city, and in the wild. Nontrivial design is suitable for active people of both sexes.

The consumer audience of Torvi Onega winter boots is women older than 18, teenagers (unisex) who prefer comfortable shoes for outdoor activities, physical work or long walking, as well as those who prefer sporty and casual style of clothing. This model is also recommended for teenagers over 13 years old, as it has an anatomical structure of the shoe.

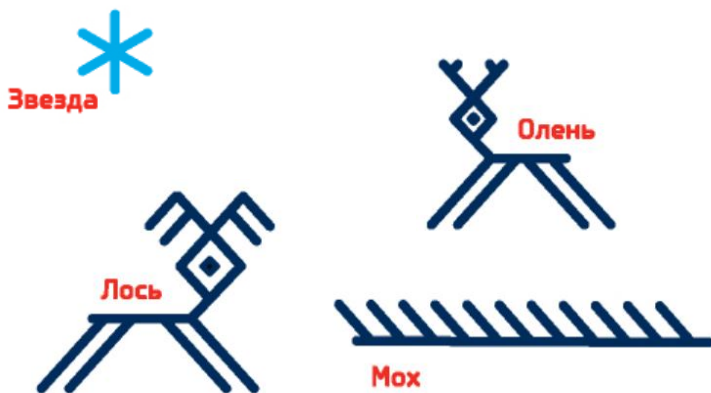

Winter boots Torvi Onega are applicable both for wearing in an urban environment, and for going outdoors

- **For everyday wear in an urban environment**
- **For outdoor activities**
- **For household chores during the mid-season**

Светоотражающий элемент служит для безопасности в темное время суток.

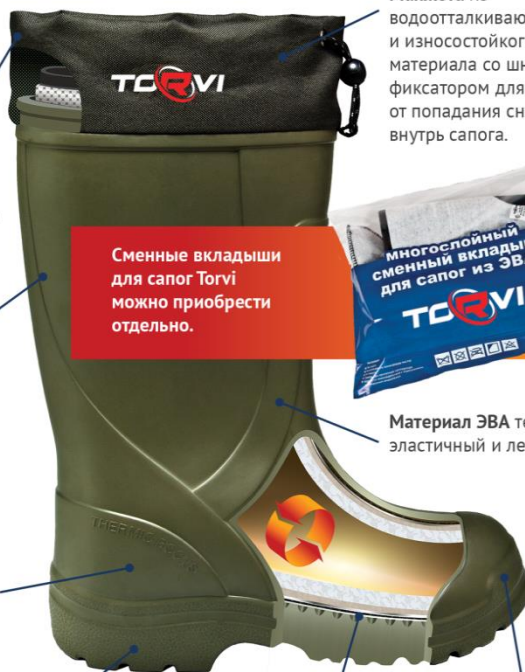

Вкладыш заканчивается выше голенища из ЭВА, поэтому при движении край сапога не травмирует голень.

Укрепленные носок и пятка защищают ногу от случайных ударов.

Глубокий протектор обеспечивает отличное сцепление с поверхностью.

Сменные вкладыши для сапог Torvi можно приобрести отдельно.

Материал ЭВА теплый, эластичный и легкий.

Уникальная ячеистая структура дна сапога для сбора влаги, которая образуется от разницы температур тела человека и окружающей среды.

Приподнятый носок уменьшает нагрузку на мышцы стопы при ходьбе.

Манжета из водоотталкивающего и износостойкого материала со шнурком и фиксатором для защиты от попадания снега внутрь сапога.
